

Cognitive and Perceptual Rehabilitation: Optimizing Function

A Comprehensive Guide for Healthcare Professionals

Cognitive and perceptual rehabilitation is a specialized field of healthcare that focuses on improving cognitive and perceptual function in individuals who have experienced brain injury, stroke, dementia, or other neurological conditions. Cognitive and perceptual impairments can have a significant impact on a person's ability to perform everyday activities, such as work, school, and social interactions. Cognitive and perceptual rehabilitation can help to improve these impairments and optimize function.

This book provides a comprehensive overview of the latest research and best practices in cognitive and perceptual rehabilitation. It is written by a team of experienced clinicians and researchers who have extensive experience in the field. The book covers a wide range of topics, including:
